Gripz Fishing Hooks

After extensive research, where the limitations of both barbed and barbless were scrutinised, there has been an obvious need for improvement thus resulting in this radical design that crosses the boundaries between what we have had and what we now have.

Made from high grade Japanese wire, the key improvement has been the introduction of a series of minute horizontal grooves on the inside of the specially designed arrow shaped hook point, where historically the barb would have been. These grooves allow the hook to hold securely in the fish's mouth when pressure is applied, as the flesh presses into the grooves resulting in a firm hook hold with no slippage.

What are you waiting for? Grab your rods and head down to your favourite water and remember to take your phone or camera!
